The objects we surround ourselves with in our homes reveal us to the world. Let yours speak volumes.

Expect more from design (we do).

Menu's philosophy is simple. We want to make the world better, less complicated, a little bit nicer to wake up to. Quite simply, Menu wants to make your favourite things. We work with some of the most exciting and driven creative individuals from the worlds of architecture and design to produce high quality design with a crisp Scandinavian look.

Menu believes in making design matter, and we're obsessed with clever solutions for modern living, objects that challenge traditions and brighten our lives: from a picnic blanket that folds into a tote bag to a wine decanter that is not only elegant but also aerates wine perfectly, allowing taste and aroma to develop. Our products are not defined by a single style. What unifies them is a shared aesthetic. We call it Scandinavian "soft minimalism" – characterised by understatement, a respect for design history and a belief that the best design should make us feel something.

Wherever we can, we work locally with craftspeople around the world, preserving skills while creating the best modern design.

Picnic Tote
by Thomas Jenkins

Details

Quite simply this is the best picnic blanket we've ever come across at Menu, stylish and utterly practical, with two layers: the base is water repellent and the top super soft. Oslo-based designer Thomas Jenkins tells us Picnic Tote is inspired by Scandinavian summers: "They're so short you often end up sitting on damp ground. By having two layers the Picnic Tote solves the problem of a wet bum!"

W/W Glass
by Benjamin Hubert

Details

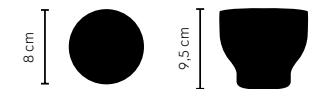

We love the minimal elegance and simplicity of W/W wine-breather carafe and stackable glasses. And very practical it is too, adding eight times more oxygen to wine and improving the flavour. Made from mouth-blown glass, W/W stands for “water” and “wine”; the carafe can be used to pour any drink of your choosing. When serving water or soft drinks, the W/W carafe’s rubber seal device prevent ice and garnishes, such as fruits and herbs, from splashing into the glasses.

by Norm Architects

Details

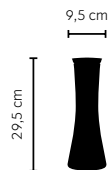

So special you will want to use them everyday, these mouth-blown glasses work for daytime, evening, guests and solo evenings curled in front of the fire with a whisky. Their slender shape makes them a pleasure to hold and drink from. The glasses also stackable, making them eminently practical. But don't let that put you off. “Practical design is sometimes destined to be soulless,” say Norm Architects. “But we wanted to challenge that. It doesn't have to look dull.”
