Corner Shelves

Corner Shelf, S
by Kyuhyung Cho

Details

We love the clever thinking behind Corner Shelf, the brainchild of Stockholm designer Kyuhyung Cho. When we write on paper, says Kyuhyung, we start from the left, allowing us to structure our words. Now he has applied that principle to shelving: “The corner is a natural starting point to organise our thoughts and also our objects.” The larger corner forms a base shelf, with the medium and small elements creating dividers. Endlessly versatile, use Corners on a desk, fix to a wall or simply place in the corner of the room.

Spoonless Container, L, Vol: 840 ml
by Murken Hansen

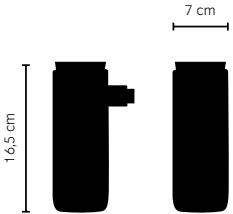

Details

We love the warm, quirky presence of these storage containers in the kitchen. Even better, they are utterly practical, designed to eliminate the need for a spoon. Simply remove the cork lid and pour. The idea came to designers Murken Hansen one day in their Berlin studio, spooning tea into a tea egg. They instantly got the feeling that the spoon was a step in the process too far... And so Spoonless was born.

Adding 10 times more oxygen to wine in under two minutes, it's little wonder that Wine Breather Deluxe is an award-winning Menu bestseller. Simply press the decanter on to the top of an opened bottle of wine and flip it over so the wine pours into the decanter. You can serve the wine directly from elegant carafe, or tip it upside again to serve from the original wine bottle.

W/W Glass
by Benjamin Hubert

Details

We love the minimal elegance and simplicity of W/W wine-breather carafe and stackable glasses. And very practical it is too, adding eight times more oxygen to wine and improving the flavour. Made from mouth-blown glass, W/W stands for “water” and “wine”; the carafe can be used to pour any drink of your choosing. When serving water or soft drinks, the W/W carafe’s rubber seal device prevent ice and garnishes, such as fruits and herbs, from splashing into the glasses.

So special you will want to use them everyday, these mouth-blown glasses work for daytime, evening, guests and solo evenings curled in front of the fire with a whisky. Their slender shape makes them a pleasure to hold and drink from. The glasses also stackable, making them eminently practical. But don't let that put you off. “Practical design is sometimes destined to be soulless,” say Norm Architects. “But we wanted to challenge that. It doesn't have to look dull.”

Rain Plaid

by Signe Hytte and Kristina Kjær

Details

Rising-star designers Signe Hytte and Kristina Kjær are fascinated by traditional crafts. While studying design together in Herning, a city in Denmark famous for its textile-weaving industry, the pair had the opportunity to work with a small textile company producing knitwear. Out of their experimenting with the company's old knitting machines the Rain collection of wool blankets and cushions was born, inspired by the dark and melancholic Scandinavian winters: "The pattern is hand drawn and tells a story about how we love to snuggle down as the biting winds shake the trees outside."

JWDA Concrete Lamp

by Jonas Wagell

Details

Honest materials – concrete and brass – are transformed into a lamp of beauty by Stockholm-based designer Jonas Wagnell. Inspired by traditional oil lamps, he brings these materials together into a design that is both raw and delicate. It has been noted that JWDA Concrete Lamp fits perfectly into any style of interior, ready to adorn a bedside table, desk or sofa table. Which suits Jonas just fine: “I want to create products that can be used every day and become part of people’s lives.”

Peek Table Lamp

by Jonas Wagell

Details

“A lamp with personality” is how Peek Table Lamp has been described. Jonas Wagell’s quirky yet utterly practical Peek Series began with a floor lamp, created to accompany a sofa he designed. “I find that floor lamps are often big and dominant,” Jonas explains. An antidote to overbearing lamps, he conceived his new lamp to literally “peek” over a sofa or armchair. The proportions have shrunk for the Table Lamp, with a dip in the top of the base for needful things – earplugs or jewellery.

Bollard Lamp
by Shane Schneck

Details

Lighting can be innovative or simple, but rarely does it excel at being both. American designer Shane Schneck – working from Office for Design, his studio in Stockholm – strives for both, bridging the worlds of design and technology. The cleverly designed silicone lamp Bollard may look like a simple pendant, but it is in fact four lamps in one. Hang it from the ceiling as a pendant, angle it as spotlight, place casually on shelf or use to beam light up by placing on its foot.

Yeh Wall Table, Low
by Kenyon Yeh

Details

Sometimes inspiration is found in the unlikely-liest of places. Take the two-legged Yeh Wall Table. Taiwanese designer Kenyon Yeh was walking to his studio when he spotted two cheerleaders practising balance exercises against a wall. “The guy had his back resting against the wall in a sitting position without a chair. The girl was standing on his thighs.” And so the table was born, a functional design that can be used as a side-table for books, plants or a table lamp. Available in two sizes.
